2. DevOps Engineer

Location: Lulla Nagar, Pune | Full-time

About OhhSpaces: We're a coworking SaaS platform automating space management for 300+ seat facilities. We handle everything from bookings to payments to access control—completely digitally.

The Mission: Take our working MVP and turn it into a bulletproof, scalable infrastructure that can handle 10+ spaces and 10,000+ concurrent users.

What You'll Build:

- CI/CD pipelines for rapid deployment
- Monitoring and alerting systems
- Database backup and disaster recovery
- Auto-scaling infrastructure
- Security hardening (payment data, user privacy)
- Performance optimization for real-time features

Current Setup:

- Cloud: GCP - GKE (you can influence final choice)
- Database: Supabase (PostgreSQL)
- Backend: Go Lang REST Api
- WebApp: React - NextJS PWA
- Mobile: React Native
- Payments: Razorpay integration

Your Day-to-Day:

- Ensure 99.9% uptime for booking and payment systems
- Monitor performance and prevent issues before users notice
- Work with product team and developers to streamline deployment
- Implement CI/CD and security best practices
- Disaster management and Recovery
- Set up comprehensive logging, analytics, monitoring and observability

You're Perfect If:

- 1-3 years DevOps/SRE experience
- Strong with GCP, Docker, Kubernetes
- Experience with databases at scale
- Security-conscious (PCI compliance aware)
- Can work independently and own infrastructure
- Startup experience preferred

What We Offer:

- ₹4-6L + equity options
- Own the entire infrastructure
- Modern tools and cloud resources
- Direct access to founders
- Technical Mentoring by professionals
- Claude MAX plan provided

Apply: Send resume + infrastructure you've built to info.ohhspaces@gmail.com with subject "DevOps - [Your Name]"
