1. Full Stack Developer (x2 positions)

Location: Lulla Nagar, Pune | Full-time

About OhhSpaces: We're a coworking SaaS platform automating space management for 300+ seat facilities. We handle everything from bookings to payments to access control—completely digitally.

About the Tech: We've built a complete coworking management platform:

- React Native booking app
- Node.js backend with real-time seat management
- Razorpay payment integration + autopay
- QR-based access control
- Admin dashboard for space owners
- Staff management system

The Challenge: We're at the exciting phase where we need to scale from 1 space to 10+ simultaneously. This requires:

- Multi-tenancy architecture refinement
- Performance optimization for high-concurrency
- New features for space owners and members
- Mobile app enhancement

Your Responsibilities:

- Build and ship features across the full stack
- Work on React Native mobile app + NextJs web dashboard
- Optimize database queries and API performance
- Integrate new payment and security features
- Collaborate directly with the product team and operations to resolve issues and bugs in the platform.
- Use Claude Code for AI-assisted development (we love it!)

Tech Stack:

- Cloud: GCP - GKE (you can influence final choice)
- Database: Supabase (PostgreSQL)
- Backend: Go Lang REST Api
- WebApp: React - NextJS PWA
- Mobile: React Native
- Payments: Razorpay integration

You're Perfect If:

- 1-3 years full-stack experience (startup background preferred)
- Strong with React/React Native + GoLang

- Experienced with payment gateway integrations
- Can own features end-to-end
- Love rapid iteration and direct user feedback
- Excited about AI-assisted coding

What We Offer:

- ₹4-6L (equity available for right candidate)
- Direct impact on product used by hundreds daily
- Claude MAX plan provided
- Technical Mentoring by professionals
